

I claim:

1. A roll of masking tape, comprising:
 - (a) a core; and
 - (b) a length of masking tape wound around the core;
 - 5 (c) wherein the masking tape comprises (i) an adhesive side and a non-adhesive side and (ii) a plurality of longitudinally spaced, laterally extending separation lines, each of the separation lines spaced longitudinally to define a segment of the tape sized to cover a standard electrical wall outlet.
- 10 2. The roll of masking tape of Claim 1, wherein the separation lines further comprise perforations.
- 15 3. The roll of masking tape of Claim 2, wherein the length of tape further comprises a first edge extending longitudinally and the perforations further comprise a first elongated cut extending from the first edge to a first termination point inward from the edge, and a plurality of perforations extending axially away from the termination point.
- 20 4. The roll of masking tape of Claim 3, wherein the segment of tape has a length and a width and wherein the length is less than $4\frac{1}{4}$ inches and the width is greater than $1\frac{3}{8}$ inches.
- 25 5. The roll of masking tape of Claim 4, wherein the length of tape further comprises a second edge opposite the first edge and the perforations further comprise a second elongated cut extending from the second edge to a second termination point inward from the second edge.
